

SREE SAI BHARGAV SARVEPALLI

Software Engineer | Full-Stack | AI/ML

Baltimore, MD | Open to Relocation | sreesaibhargav@gmail.com | +1 (667) 452-0666 | [LinkedIn](#) | [GitHub](#)

EDUCATION

University of Maryland, Baltimore County (UMBC)

Baltimore, MD

Master of Science in Computer Science

2026

Relevant Coursework: Data Structures & Algorithms, Software Testing, Operating Systems, Processes/Threads, Memory Management, File Systems, Networking

B V Raju Institute of Technology

India

Bachelor of Technology in Computer Science

2024

EXPERIENCE

AxionTech

Texas, US

AI Engineer Intern (Full-Stack Applications)

Jul 2025 – May 2026

- Shipped production full-stack features using Python, Java, React/TypeScript, REST APIs, SQL, and Azure for 50+ users across backend services, user-facing workflows, automated testing, debugging, and deployment.
- Improved API and workflow reliability by ~20% through validation, unit/integration testing, issue diagnosis, defect resolution, and iterative fixes across frontend, backend, and database layers.
- Reduced recurring support and troubleshooting effort by ~20% by automating workflows, documenting technical decisions, and resolving production issues with engineering, product, and business stakeholders.

University of Maryland, Baltimore County

Baltimore, MD

Graduate Assistant

2025 – 2026

- Supported **60+ students per semester** with Java/Python programming, algorithms, debugging, software implementation, testing, and systems fundamentals.
- Reviewed **100+ programming assignments and labs**, evaluating correctness, edge cases, readability, testing quality, secure practices, and maintainability.
- Reduced repeated student support questions by ~15% through structured office-hour guidance, reusable troubleshooting explanations, and clear written feedback while coordinating with faculty.

CognySync

India

AI Engineer (Software Engineering & Data)

Jul 2023 – Aug 2024

- Built Python/Java services, REST APIs, and data-processing pipelines over **100K+ records**, integrating SQL, relational databases, validation logic, and cloud-hosted applications.
- Improved processing efficiency by ~20% across production-oriented services through validation, exception handling, performance tuning, testing, debugging, and monitoring.
- Reduced production issue turnaround by ~25% through improved logging, API-level troubleshooting, release validation, and collaboration with engineering and product teams.

TECHNICAL SKILLS

Programming: Java, Python, TypeScript, JavaScript, SQL

CS Fundamentals: Data Structures, Algorithms, OOP, Operating Systems, Systems Thinking, Processes/Threads, Memory Management, Networking

Full Stack: React, Next.js, FastAPI, REST APIs, PostgreSQL, Supabase, HTML/CSS

Testing & Quality: Unit Testing, Integration Testing, Regression Testing, End-to-End Testing Concepts, Debugging, Code Reviews

Cloud & Delivery: Git, GitHub, CI/CD, Docker, Microsoft Azure, Production Deployment, Monitoring

Software Engineering: SDLC, System Design, Scalable Systems, API Integration, Agile Development, Technical Documentation, Cross-Functional Collaboration

AI: Generative AI, LLM Integrations, AI Coding Assistants, Prompt Engineering, AI Output Validation

PROJECTS

NextTask — Full-Stack AI Productivity Platform

React | TypeScript | Supabase | Claude AI

- Built and deployed a live SaaS-style application with Google OAuth, real-time collaboration, role-based access, relational data, and AI-assisted task creation/summarization, reducing manual task-entry effort by ~30% in test workflows.

Pulsar Star Detection — Scientific ML Application

Python | Scikit-learn | FastAPI | Docker

- Built an end-to-end ML application with data validation, API-based inference, interactive visualization, and containerized deployment, achieving **~96% cross-validation performance**.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- HackerRank — Problem Solving and Java
